Cyber Security Quick Tips

- Follow principle of least privilege: limit user accounts and whitelist applications
- Turn on and check automatic updates
- Lock down accounts with multi-factor authentication (MFA)
- Verify all senders and links without clicking
- Avoid free public Wi-Fi

- Use password managers (Chrome)
- Back up everything
- Secure/wipe drives before disposal
- Change default passwords on all devices
- Use advanced endpoint protection in addition to anti-virus and anti-malware
- Call NetTec for all your IT needs!
